A Sample Book Using Quarto with Standard LaTeX Book Class

Your Name John Doe

2023-06-23

This document demonstrates how to use Quarto with the standard LaTeX book document class. It produces PDF output suitable for monographs, dissertations, and long-form academic writing.

Introduction

This file is a sample book demonstrating Quarto's capabilities with the standard LaTeX `book` document class. It supports PDF (via LaTeX) output. It is assumed that the reader has a basic working knowledge of stochastic calculus Karatzas and Shreve (1991) and stochastic control theory Yong and Zhou (1999).

Theorem 0.1 (Residue Theorem)**.** *Let f be analytic in a simply connected domain D. Then for any closed contour $\gamma \subset D$,*

$$\oint_\gamma f(z)\,dz = 2\pi i \sum_k \operatorname{Res}(f, z_k)$$

This template supports standard Quarto cross-references. You can refer to Theorem Theorem 0.1 in the text.

Markdown Basics

The template is built on Quarto and Pandoc, leveraging standard LaTeX tools for PDF output.

Equations

Inline math: $E = mc^2$. Display math:

$$\frac{\partial u}{\partial t} = \alpha \nabla^2 u$$

Theorems and Proofs

Lemma 0.1 (Key Lemma)**.** *If f is continuous on $[a, b]$, then f is integrable on $[a, b]$.*

Corollary 0.1 (Easy Corollary)**.** *Every continuous function on a closed interval is bounded.*

Definition 0.1 (Model Definition)**.** A stochastic process $\{X_t\}_{t\geq 0}$ is a collection of random variables indexed by time.

Lists

1. First item
2. Second item
3. Third item

- Bullet one
- Bullet two

Tables

Table 1: A sample table

Variable	Description	Unit
x	Position	m
v	Velocity	m/s
a	Acceleration	m/s^2

Bibliography

This template uses `natbib` with the `plainnat-doi` bibliography style for author-year citations Karatzas and Shreve (1991).

Acknowledgment

This should be a simple paragraph before the References to thank those individuals and institutions who have supported your work on this book.

Use the `[]{.appendix options="An Appendix"}` markup if you have a single appendix. Do not use `\section{}` after `\appendix` in LaTeX.

Karatzas, Ioannis, and Steven E. Shreve. 1991. *Brownian Motion and Stochastic Calculus*. Springer New York. https://doi.org/10.1007/978-1-4612-0949-2.
